

10. Tracking Advanced Statistics

If you have specified that you wish to track Advanced Statistics in your Match setup, you will be presented with additional control buttons on the main scoring screen and Action Editor for tracking these statistics.

Advanced Statistics

These controls will also automatically enable and disable depending on the current position of the wrestlers.

Note that if an advanced statistic results in a score (such as a Takedown from a Shot), the score will automatically be recorded and you will not need to record a separate takedown.
