

# Using the Post-Match Result Entry Tool for entering offline matches

If you have a match that wasn't scored live on StatInput, but you would still like the results/statistics to display in your season reports, you can enter the results in the Post-Match Result Entry Tool.

If you have an official scoresheet or postmatch report, you can use the tool to input the scoring results of each bout. Please see steps listed as **Scoresheet Entry**

If no scoresheet is available and only final results/scores, you can still use the tool to track the results for use in season records, etc. Please see steps listed as **Final Results Entry**

## Begin by either adding or selecting an existing match/tournament

### Mens Wrestling 2023

Click on a match in the grid below to select and manage it.

**Using the notations listed at the top of the page, enter the scoring results for each wrestler.**

Each Period has a table associated with it where you can enter the score notations for both wrestlers.

Clicking on a cell will reveal a dropdown menu where you can select an acceptable score notation. Each time a new score is added, an additional row will automatically be added to the bottom.

Blank rows/cells will be ignored.  
 Periods that left blank with no recorded action will be ignored. To indicate a period took place with no recorded action, check the 'No Scoring' switch.

Scoring should be entered in the alternating order that it occurred in the match.

If no scoring took place in a period, be sure to check the box to notate that so that the period is not skipped during processing.

## Once all scoring has been entered, complete the Outcome/Decision fields at the bottom of the page

Be sure to mark the winning wrestler and the decision type.
